Document Title    Compatibility between ASX Range Sensors and AS  
Range Bases

Date                August 2000

Version            AP007/ISS 1

## APPLICATION NOTE

# Compatibility between ASX Range Sensors and AS Range Bases

Hochiki's ASX range of sensors can be mounted onto the AS range YBJ-RL/2NA base, the sensors are polarity conscious and must be fitted as shown below.

Figure 1

The three plastic lugs shown below must be carefully broken off to allow the sensor to fit onto the base.

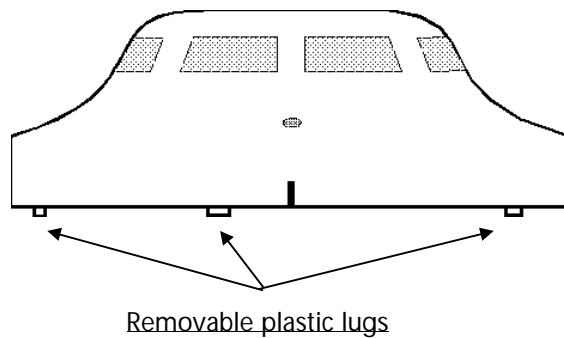

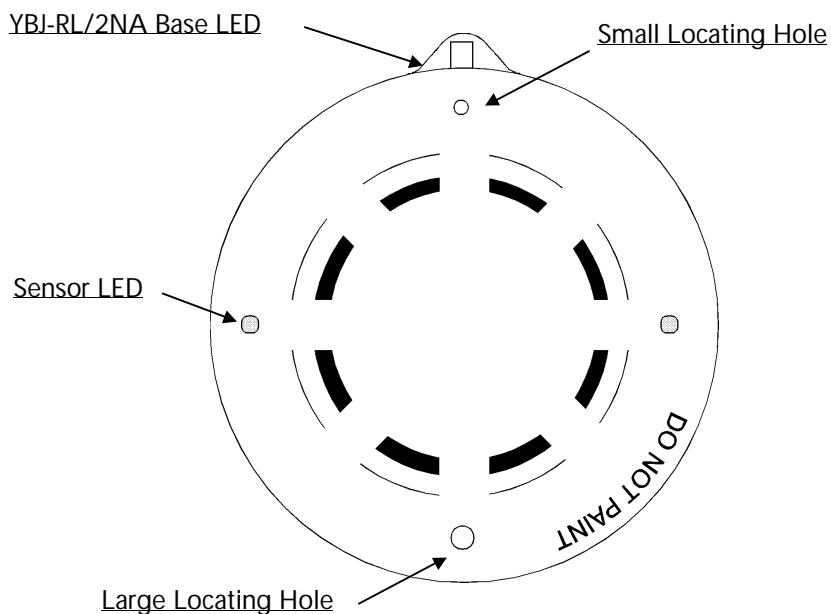

Figure 2

The sensor can now be fitted to the base in the orientation as shown below, with the small locating hole nearest the base LED.

Please note if the sensor is fitted to the base in another orientation the control panel will not recognise the sensor.
