Key Benefits to working with
a Systems Partner

Your Safety, Our Technology

SYSTEMS PARTNERS OVERVIEW

Hochiki is continually adapting to the changes within the fire detection industry and strives to open up new markets and new opportunities for both itself and its customers.

On-going extensive research into growing trends shows there continues to be a significant growth of life safety systems business available to those companies that can adapt and rise to the challenges in this ever-changing environment.

Building on the combined strengths of the world proven Hochiki fire detection and control equipment range, the HFP systems package comprises not only a vast array of fire detection devices, but also the first intelligent low voltage emergency lighting system in the UK. The combination of these market-leading product ranges into one exclusive offering provides the most flexible, powerful and configurable life safety systems on the market and is available exclusively to Hochiki's Systems Partners.

The Hochiki Systems Partners are a nationwide network of trained, professional and accredited fire alarm companies, recognised in the UK for their high levels of expertise, workmanship, customer service and quality. Working in close harmony with these Systems Partners, Hochiki promotes the world-leading HFP brand of complete life safety systems into several key vertical markets such as construction, health, education, leisure, transport and many others.

KEY CLIENT BENEFITS TO WORKING WITH OUR SYSTEMS PARTNERS

LATEST TECHNOLOGY

Hochiki's HFP system as an umbrella brand is continually being developed with the regular addition of the latest life safety technology. Only our approved Systems Partners have exclusive access to this extended range of open protocol equipment. This means they are free to specify and install the best components to meet the precise requirements of the project, all backed up by the world renowned Hochiki promise of quality and reliability.

INDUSTRY ACCREDITATION

Adhering to strict criteria, all of our Systems Partners are accredited to the main industry-recognised quality standard BAFE. This give the end-user total peace of mind that the installation will be carried out to the highest levels of quality and safety.

NATIONAL COVERAGE

The Hochiki Systems Partners scheme has been rolled out across the whole of the UK, providing a flexible network of bespoke integrators capable of responding to a wide range of enquiries for projects in many different sectors and locations.

HOCHIKI - THE LEADER IN INNOVATIVE LIFE SAFETY SOLUTIONS

For almost 100 years Hochiki has led the way in the design and manufacture of innovative life safety solutions. Its cutting edge commercial and industrial fire detection and emergency lighting products have acquired global acceptance as the benchmark for high integrity and long-term reliability.

Hochiki's vision is to provide products and systems that achieve the highest levels of quality. Its range of products virtually eliminates unwanted alarms and, combined with ease of installation, results in unsurpassed dependability and the lowest total cost of ownership possible.

With global annual sales turnover exceeding £400m Hochiki is a wholly independent, multinational, publicly listed company with over 1,500 employees working across five manufacturing plants, 31 sales offices and 18 subsidiaries.

Its ongoing commitment to manufacturing innovation ensures customer satisfaction and its production facilities in Japan, the USA and Europe offer international continuity in quality, service and supply.

EXCELLENCE AS STANDARD

Hochiki offers complete solutions for all fire detection and emergency lighting requirements. The Enhanced Systems Protocol (ESP) is a digital communications solution for intelligent fire detection and fully integrated systems, while the CDX range provides solutions for most conventional fire detection applications.

The company also has a range of solutions suited to more specialised environments. This includes the FIREwave wireless fire detection system for use in locations where minimum disturbance to the fabric of the building is important, the FIRElink aspirating solution and the FIREvac voice evacuation system. These are perfectly complemented by FIREscape, Hochiki's pioneering LED based emergency lighting system.

The company's manufacturing plants are accredited to ISO 9001 and through objectives and targets outlined within its corporate environmental policy and ISO 14001 certification, Hochiki is constantly developing new ways to reduce its environmental impact.

ONE-STOP SHOP

Our Systems Partners can provide a competitive turn-key solution for any project providing consultancy, design, installation, commissioning and on-going maintenance. In this way they can support you and your project from early inception to final hand-over and beyond, providing a seamless, hassle-free total service solution.

TRUE PARTNERSHIP

Hochiki is continuously helping to develop our Systems Partners with a regular programme of product and system training, shared marketing activities and CPD seminars ensuring they perform to the best of their abilities within their sectors. This activity is backed up by Hochiki's full technical support service including on-site consultancy where required, giving the end-user additional peace of mind.

Intelligent

The **ESP** intelligent range incorporates a variety of high performance sensors, modules and ancillary devices to increase the ease of routine maintenance and commissioning. Enhanced System Protocol (ESP) applies Hochiki's high integrity communications link to all products in the range.

Conventional

Hochiki's **CDX** range covers one of the most extensive product portfolios, and provides solutions for most conventional fire detection applications, as well as security systems due to its wide voltage range (9.5~30 V dc).

Complete System

Hochiki's **HFP** system offers a complete, flexible fire detection system which can be configured for any environment.

Emergency Lighting

FIREscape is a fully intelligent system based on LED technology and promises a flexible system low in voltage, that is simple to install and maintain, and reduce costs of ownership dramatically.

Specialist

For controlled environments, Hochiki's **FIRElink** range consists of high sensitivity air sampling equipment that identifies the faintest traces of smoke.

Hybrid Wireless System

Hochiki also caters for hybrid sites with the **FIREwave** range which integrates wireless technology into Hochiki's ESP hard-wired system to provide maximum flexibility and meet specific site requirements
