World Class Leaders in Fire Detection Since 1918

Introduction
Hochiki has a distinguished heritage of specialist technological expertise which has gained the group its international status as one of the world’s leading manufacturers of commercial and industrial fire detection solutions. Established early in the twentieth century, Hochiki has remained an independent, multi-national company which now employs over 1500 personnel in total, operating five manufacturing plants, thirty-one sales offices and eighteen subsidiaries.

Hochiki Europe (UK) Ltd manufactures and distributes product for Europe, the Middle East, CIS, Indian Sub-Continent and Africa and is dedicated to providing sales and technical services to these markets.

World Proven Performance
With a heritage of innovative design and leading edge technologies, Hochiki’s products have gained widespread acceptance as the benchmark for high-integrity and long-term reliability throughout the world.

Research and Development for Life Safety
Hochiki owns the world’s largest, purpose-built, state of the art fire test laboratory. This ensures that the pedigree of Hochiki products remains unrivalled and guarantees that even large scale designs are fully proven in real fire conditions.

In addition, the Group employs over 100 specialist research and development engineers that undertake activities from fundamental research into the physical properties of fire, to hardware and software product design and development.
Delivery Quality
Acknowledged globally by system specifiers and integrators as an international market leader in the manufacture of fire products, the main benefits of using Hochiki devices are:
- High quality of products ensure long term reliability
- Easy to install
- Open Protocol for choice and flexibility
- Reduced cost of ownership
- Virtual elimination of false alarms
- Compliance to standards

Types of Fire Detection System
Hochiki offers many types of fire detection system; this includes the ESP intelligent analogue addressable fire alarm system, the CDX conventional system and FIREwave, a hybrid wired/wireless system. These ranges are supplemented by a large selection of ancillary and test equipment.

Product Colour Key
Some products are available in a range of colours, and where appropriate, a colour swatch is shown next to these products denoting which colours are available. For example □ denotes product available in ivory.

Hochiki’s comprehensive ESP intelligent (Analogue Addressable range) is suitable for even the most demanding environments and incorporates high performance sensors, a wide selection of input and output modules and ancillaries. All products use Hochiki’s high integrity digital communications link ‘ESP’ (Enhanced Systems Protocol) that’s at the heart of the ESP range.

www.hochikieurope.com/esp
ALN-EN
An Intelligent Photoelectric Smoke Sensor incorporating Hochiki’s unique High Performance Chamber which allows the sensor threshold level to be increased, thereby improving the signal to noise ratio and reducing susceptibility to false alarms.

- Removable, High Performance Chamber
- Twin fire LEDs allow 360° viewing
- Locking mechanism (sensor to base)
- Variable sensitivity
- Electronically addressed
- Pulsing/non-pulsing controlled from panel*
- Addressed via TCH-B200 Hand Held Programmer
- Approved by LPCB, VdS & to SIL2
- Also available with an integrated SCI.

ACC-EN
An Intelligent Multi Sensor incorporating a thermal element and a High Performance photoelectric smoke chamber. Has three modes controlled from the Control Panel, allowing either the optical or thermal element or both to be active in making the fire decision.

- User selectable modes
- Incorporates Optical & Heat elements
- Removable, High Performance Chamber
- Twin fire LEDs allow 360° viewing
- Pulsing/non-pulsing controlled from panel*
- Variable sensitivity
- Electronically addressed
- Addressed via TCH-B200 Hand Held Programmer
- Approved by LPCB, VdS & to SIL2
- Also available with an integrated SCI.

ATJ-EN
An Intelligent Multi-Heat Sensor incorporating a variable Fixed Temperature heat element and Rate Of Rise heat element, both controlled from the Control Panel allowing either thermal element or both elements simultaneously to be active in making the fire decision.

- User selectable modes
- Incorporates Fixed Temperature and Rate Of Rise Heat elements
- Twin fire LEDs allow 360° viewing
- Pulsing/non-pulsing controlled from panel*
- Electronically addressed
- Addressed via TCH-B200 Hand Held Programmer
- LPCB & VdS approved to Classes A, B & C
- Approved to SIL2
- Also available with an integrated SCI.

ACD-EN*
Addressable Multi Sensor with CO detection
An addressable loop-powered multi-sensor, with smoke, heat and CO sensing elements. The unit offers 24 different modes of operation* and seamlessly matches the other sensors in the ESP Range. The CO sensing element can be used to detect smoke as well as life-threatening CO levels (acting as a CO alarm).

- User selectable modes
- Low profile
- Twin fire LEDs allow 360° viewing
- Multiple modes
- Heat, Optical and CO sensing elements
- CO Alarm (COHb) facility
- 10 year CO sensor life
- Programmable fire threshold level
- RI & LED controllable separately if required
- 2 colour LED (Polling: Green, Fire: RED)
- Addressed via TCH-B200 Hand Held Programmer.

*Please ensure control panel compatibility
**Sci Sensor Variants**

**ALN-EN(Sci)**
An Intelligent Photoelectric Smoke Sensor with SCI incorporating Hochiki’s newest High Performance Chamber Technology removing the need to use Ionisation Smoke Sensors in the majority of applications. This also allows the sensor threshold level to be increased, thereby improving the signal to noise ratio and reducing susceptibility to false alarms.

- Removable, High Performance Chamber
- Twin LEDs allow 360° viewing – green when polling, amber when isolating, red in fire
- Locking mechanism (sensor to base)
- Variable sensitivity
- Pulsing/non-pulsing controlled from panel*
- Electronically addressed via TCH-B200 Hand Held Programmer.

**ACC-EN(Sci)**
An Intelligent Multi Sensor with SCI which is fully compatible with Hochiki’s ESP Analogue Addressable Protocol, and incorporates a thermal element and a High Performance photoelectric smoke chamber.
The ACC-EN(Sci) has three modes, which are controlled from the Control Panel, allowing either the optical element or thermal element or both elements to be active in making the fire decision*.

- User selectable modes
- Incorporates Optical & Heat elements
- Removable, High Performance Chamber
- Pulsing/non-pulsing controlled from panel*
- Twin LEDs allow 360° viewing – green when polling, amber when isolating, red in fire
- Variable sensitivity
- Electronically addressed via TCH-B200 Hand Held Programmer.

**ATJ-EN(Sci)**
An Intelligent Multi-Heat Sensor with SCI which is fully compatible with Hochiki’s ESP Analogue Addressable Protocol. The ATJ-EN(Sci) incorporates a Variable Temperature heat element and a Rate of Rise heat element, both of which are controlled from the Control Panel, allowing either thermal element or both elements simultaneously to be active in making the fire decision.

- User selectable modes
- Incorporates Fixed Temperature and Rate of Rise Heat elements
- Twin LEDs allow 360° viewing – green when polling, amber when isolating, red in fire
- Pulsing/non-pulsing controlled from panel*
- Electronically addressed via TCH-B200 Hand Held Programmer.

**YBV-R/4**
SCI Sensor Mounting Base which is fully compatible with Hochiki’s ESP range of SCI sensors. It is supplied with square cable clamps for secure and reliable cable termination and is also capable of driving a remote LED if required.

- Electronics free
- Stainless steel contacts
- Takes 2.5 mm² cables
- Slim profile - only 8 mm
- Rugged wiring contacts
- Facility for remote indicator
- Quick Connection via square cable clamps
- Fourth terminal enables SCI functionality.

*Please ensure control panel compatibility*
ACB-EW  
**An Intelligent IP67 Rated Waterproof Multi-Heat Sensor** which can be used externally and is supplied with its own fixing base which is used to fix the sensor. Flying leads from the sensor connect directly to the loop via waterproof connectors.

- User selectable modes
- Incorporates Fixed Temperature and Rate Of Rise Heat elements
- Twin fire LEDs allow 360° viewing
- Pulsing/non-pulsing controlled from panel
- IP67 rated
- Supplied with fixing base
- Electronically addressed via TCH-B200 Hand Held Programmer & PL-2
- LPCB & VdS approved to Classes A, B & C.

YBN-R/3  
**A Common Mounting Base** which is fully compatible with Hochiki’s ESP range of sensors. Supplied with square cable clamps for secure and reliable cable termination and is also capable of driving a remote LED if required. (Red version for Sounders available - see below)

- Electronics free
- Stainless steel contacts
- Takes 2.5mm² cables
- Slim profile - only 8mm
- Rugged wiring contacts
- Facility for remote indicator
- Quick Connection via square cable clamps
- Sounder version available in either red or white for use with CHQ-WS2 Wall Sounders or CHQ-WSB2 Wall Sounder Beacons - YBO-R/3 and YBO-R/3(WHT).

FB-1  
**An Addressable Reflective Beam Smoke Detector** designed to protect large open spaces, features separate detector and controller. The detector unit incorporates a motorised head that can align itself during commissioning. Additional reflector kits enhance detection range.

- Controlled and adjusted from ground level utilising included controller
- 5-40m standard detection range
- Extension kits available to enhance detection range up to 100m
- Fully compatible with the Hochiki ESP analogue addressable protocol
- Addressed via TCH-B200 Hand Held Programmer & PL-3
- Continually corrects itself against building movement
- Approved by VdS.

CHQ-WS2  
**An Intelligent Loop-Powered Wall Sounder** providing 8 volume levels and 51 tones with a maximum output of up to 102 dB(A) (±2 dB(A)) with low current consumption.

- Loop Powered
- Single Loop Address - addressed via the TCH-B200 Hand Held Programmer
- Variable Sound Output 90 – 102 dB(A) (±2 dB(A)) output at 1 metre
- Weatherproof Kit available
- Auto-shutdown Mode available*
- Approved by LPCB, VdS & to SIL2
- 51 User-Selectable Tones (all tones EN54-3 compatible).

---

*Please ensure control panel compatibility.
**CHQ-WSB2**

An Intelligent Loop-Powered Wall Sounder Beacon as per the CHQ-WS2 but additionally featuring an integral beacon within the horn which utilises high intensity LED technology.

As per CHQ-WS2 plus:
- Variable flash frequency*
- High Intensity LED technology
- Independent control of Sounder and Beacon**
- Auto-shutdown Mode available - can be set independently for sounder or beacon**
- Approved to EN54-23: 2010 - Category ‘O’
- Addressed via TCH-B200 Hand Held Programmer.

**YBO-R/3**

is a Sounder Mounting Base which is fully compatible with Hochiki’s ESP range of sensors and designed specifically for the Hochiki range of wall sounders, the CHQ-WS2 Wall Sounder and the CHQ-WSB Wall Sounder Beacon.

It is supplied with square cable clamps for secure and reliable cable termination.
- Electronics free
- Stainless steel contacts
- Takes 2.5 mm² cables
- Slim profile - only 13 mm
- Rugged wiring contacts
- Quick Connection via square cable clamps
- Also available in white
- Short Circuit Isolator version available - YBO-R/SCI(RED) & YBO-R/SCI(WHT-SND).

**CHQ-WPK**

A Weatherproof Back Box and gasket set for the CHQ-WS2 Wall Sounder, CHQ-CB Ceiling Beacon, CHQ-WB Wall Beacon and CHQ-WSB2 Wall Sounder Beacon, increases the IP Rating of the Sounder to IP65 for external use.
- Easy to install
- Increases sounder IP Rating from IP21 to IP65 (external use)
- Increases beacon IP rating from IP21 to IP33 (external use).

**YBO-BS**

An Intelligent Loop-Powered Base Sounder providing 13 volume levels and 51 tones with a maximum output of up to 98 dB(A) (±2 dB(A)) with low current consumption.

Compatible bases: YBN-R/3 or YBN-R/3(SCI) Bases.
- Loop Powered
- Single Loop Address - addressed automatically by Control Panel or via the TCH-B200 Hand Held Programmer
- 50 – 98 dB(A) (±2 dB(A)) output at 1m
- Fits Hochiki Standard or Isolator Base and supports ESP Sensors, Beacons and Remote Indicator
- Approved by LPCB, VdS & to SIL2
- 51 User-Selectable Tones (all tones EN54-3 compatible).

---

*Please ensure control panel compatibility. **For product variants, see pages 44 to 47.
An Intelligent Loop-Powered Remote Indicator, with high-intensity LEDs and a Fresnel lens design which produces a highly visible signal. The casing exactly matches the Hochiki ESP Sensor range in shape and colour providing seamless integration.

- High Intensity LED technology
- Addressable via TCH-B200
- Approved by VdS
- Non EN54-23 Compliant.

An Intelligent Loop-Powered Wall Beacon with a high intensity LED and a custom designed free-form optic which produces a highly visible flash. Variants available in 5m, 7.5m, 10m and 15m area coverage.

- High Intensity LED technology
- 0.5/1 Hz flash frequency
- Addressable via TCH-B200
- Choice of 2 LED colours (red and white)
- Approved to EN54-23: 2010 - Category 'W'
- High efficiency
- Selectable light output*1
- Operating Voltage 17-41 VDC.

An Intelligent Loop-Powered Base Sounder Beacon providing 13 volume levels and 51 tones with a maximum output of up to 98 dB(A) (±2 dB(A)) with low current consumption.

Compatible bases: YBN-R/3 or YBN-R/3(SCI) Bases.

- Loop Powered
- Single Loop Address, addressed by either Control Panel or TCH-B200
- 50 ~ 98 dB(A) (±2 dB(A)) output at 1m
- Fits Hochiki Standard or Isolator Base and supports ESP Sensors, Beacons and Remote Indicator
- Beacon and Sounder can be controlled independently*1
- Approved to EN54-23: 2010 - Category 'O'
- 51 User-Selectable Tones (all tones EN54-3 compatible).

An Intelligent Loop-Powered Ceiling Beacon with a high-intensity LED and a custom designed free-form optic which produce a highly visible flash. Variants available in 5m, 7.5m, 10m and 15m area coverage.

- High Intensity LED technology
- 0.5/1 Hz flash frequency
- Addressable via TCH-B200
- Choice of 2 LED colours (red and white)
- Approved to EN54-23: 2010 - Category 'C'
- High efficiency
- Selectable light output*1
- Operating Voltage 17-41 VDC.

*Please ensure control panel compatibility. *1For product variants, see pages 44 to 47.
CHQ-SOM
An Intelligent Single Output Module designed to allow a single relay output to be connected to the ESP loop. The unit incorporates a volt-free relay contact that can be configured as either N/O or N/C, the relay contact is rated to 30 V DC (max), 1 A (resistive load). The CHQ-SOM features three colour-coded flying leads, the unit also features a wiring terminal block for loop connection.
- Small design for simple provision of a monitored input onto an ESP loop
- Colour-coded flying leads for simple installation
- Small design, provides simple connectivity to ESP loop for third-party devices, such as IFD-E.

CHQ-AB
An Intelligent Loop-Powered Visual Indicator with high-intensity LEDs and Fresnel lens design which produces a highly visible flash. The casing exactly matches the Hochiki ESP Sensor range in shape and colour providing seamless integration.
- High Intensity LED technology
- 1 Hz flash frequency
- Addressable via TCH-B200
- Choice of 3 lens colours (red, amber and blue)
- Approved by VdS (red and amber lens)
- Non EN54-23 Compliant
- Supplementary indicator.

CHQ-POM
An Intelligent Powered Output Module designed to supply a nominal 24 V DC at various, user-selectable current levels from 2 to 32 mA (in increments of 2 mA). The unit is small enough to be added to other third-party devices thereby allowing a range of equipment to be added to the ESP loop. The unit also features two monitored inputs.
- Supplies a nominal 24 V DC at various current levels, 2 mA to 32 mA in increments of 2 mA
- User-selectable current output
- Includes two monitored inputs
- Approved by LPCB & VdS
- Addressed with TCH-B200 Hand Held Programmer & PL-3
- Colour-coded flying leads for simple installation
- Small design, provides simple connectivity to ESP loop for third-party devices, such as IFD-E.

CHQ-SIM
An Intelligent Single Input Module designed to allow a single monitored input to be connected to the ESP loop. This provides a compact, low-cost option where the installation of the larger CHQ ‘Smart-Fix’ Range of Modules might be difficult.
- Small design for simple provision of a monitored input onto an ESP loop
- Flying leads for easy installation
- Addressed with TCH-B200 Hand Held Programmer & PL-3
- Approved by LPCB & VdS.
**CHQ-MRC2**
An Intelligent Mains Relay Controller providing a single mains rated relay output for the control of such devices as dampers, extractors or plant and equipment shut-down. The monitored input can be used for local power supply fault monitoring or as a general-purpose input. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.
- 1 x mains out & 1 x input
- Loop-powered
- Single loop address
- DIL switch addressable
- Single mains rated relay contact
- Relay contact rated at 250 VAC @ 5A (resistive) & 48 VDC @ 2A (resistive)
- Auxiliary monitored input
- Both models approved by LPCB
- Can be used with CHQ-BACKBOX to comply with BS 7671.

**CHQ-DRC2/SCI**
An Intelligent Dual Relay Controller designed to provide two general-purpose relay outputs, each output can be controlled independently and used to control dampers, plant and equipment shut-down. The monitored input can be used for local power supply fault monitoring or as a general-purpose input. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.
- Loop powered
- Single loop address
- DIL switch addressable
- Relays contact rated at 30 VDC at 1 A
- Auxiliary monitored input
- Both models approved by LPCB & VdS
- Deeper back box available CHQ-BACKBOX
- Two independently controlled changeover relays
- Can be used with CHQ-BACKBOX to comply with BS 7671.

**CHQ-PCM/SCI**
A Plant Control Module with four independent change-over relay outputs, with N/O and N/C volt free contacts and four inputs. These outputs can be driven separately by the fire alarm control panel and can be used for the control of devices such as dampers or for plant and equipment shut-down. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.
- 4 x inputs & 4x outputs
- Single loop address
- Loop powered
- DIL switch addressable
- 4 change-over relay outputs
- 4 independent inputs for monitoring of volt-free contacts
- Both models approved by LPCB
- Deeper back box available CHQ-BACKBOX
- Can be used with CHQ-BACKBOX to comply with BS 7671.

**CHQ-DIM2/SCI**
An Intelligent Dual Input Module designed to interface to a variety of inputs such as door contacts, sprinkler flow/door switches and plant equipment. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.
- Loop powered
- Single loop address
- DIL switch addressable
- Each input can be configured to operate on either an open or short-circuit.
- Both models approved by LPCB & VdS
- Can be used with CHQ-BACKBOX to comply with BS 7671.
**CHQ-DZM(SCI)**
An Intelligent Dual Zone Module designed to allow up to 60 conventional detectors (30 per zone) or up to 6 SPC-ET (3 per zone) to be interfaced to Hochiki’s ESP analogue addressable system. The unit also features Schottky and Zener line continuity options. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.

- 2 x zonal inputs
- Single loop address
- Supports two independent zones of conventional detectors
- DIL switch addressable
- Requires an auxiliary 24 VDC supply
- Both models approved by LPCB
- Deeper back box available CHQ-BACKBOX
- Both zones fully monitored for Open and Short Circuit
- Can be used with CHQ-BACKBOX to comply with BS 7671.

**CHQ-SZM2(SCI)**
An Intelligent Single Zone Monitor designed to allow up to 6 conventional detectors or 1 SPC-ET to be interfaced to Hochiki’s ESP analogue addressable system. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.

- 1 x zonal input
- Loop powered
- Up to 6 Conventional Detectors
- DIL switch addressable
- Single loop address
- Remote LED output
- Both models approved by LPCB & VdS
- Deeper back box available CHQ-BOX
- Fully monitored for Open and Short Circuit faults
- Can be used with CHQ-BOX to comply with BS 7671.

**CHQ-DSC2(SCI)**
An Intelligent Dual Sounder Controller which has been designed to provide two sounder outputs (that can be driven separately) with full fault monitoring. The monitored input can be used for local power supply fault monitoring or as a general-purpose input. Also available as a DIN Rail mountable version. Both models feature an integral short-circuit isolator.

- Single loop address
- Two independent sounder circuits
- DIL switch addressable
- Each circuit fully monitored for Open and Short Circuit faults
- Each alarm circuit fused at 1 A
- Auxiliary monitored input
- Outputs are synchronised and can be driven continuously or intermittently
- 24 VDC auxiliary power required
- Both models approved by LPCB & VdS
- Can be used with CHQ-BOX to comply with BS 7671.

**HCP-E(SCI)**
An Intelligent Manual Call Point Isolator fully compatible with Hochiki’s ESP analogue addressable protocol and featuring an integral short-circuit isolator (SCI). Features a bi-coloured LED to indicate either fire (red) or short-circuit (amber). Also features plug-in wiring terminals for easy installation.

- Fast response
- Integral short-circuit isolator
- Bi-colour status LED
- Non-frangible element fitted as standard (conforms to EN54)
- Addressed with TCH-B200 Hand Held Programmer & PL-3
- Surface or flush mounting
- LPCB Approved to EN54
- Approved to SIL2.
**HCP-W(SCI)**
An Intelligent IP67 Weatherproof Manual Call Point Isolator fully compatible with Hochiki’s ESP analogue addressable protocol and featuring an integral short-circuit isolator (SCI). Features a bi-coloured LED to indicate either fire (red) or short-circuit (amber). Also features plug-in wiring terminals for easy installation.
- Fast response
- Integral short-circuit isolator
- Bi-colour status LED
- Non-frangible element fitted as standard (conforms to EN54)
- Addressed with TCH-B200 Hand Held Programmer & PL-3
- Surface mounting
- LPCB Approved to EN54
- IP67 rated
- Approved to SIL2.

**SR BACKBOX**
Call Point Surface Mounting Box for HCP-E(SCI)
- Allows addressable call point HCP-E to be surface mounted.

**PS200**
Hinged cover for Call Point. An acrylic hinged cover for the HCP-E(SCI) manual call point range which protects against accidental operation/vandalism.
- Easy to install
- Protects against accidental activation
- Requirement under BS5839.

**TCH-B200**
A Hand Held Address Programmer designed to address the ESP range of Sensors and other intelligent devices such as the YBO-BS Base Sounder. Designed to be light, robust and easy to use it operates from a single PP3 size battery which can provide up to 8000 operations.
- Lightweight design
- Quick and reliable addressing
- Up to 8000 address settings from one battery
- Displays sensor analogue value.

Note: Button colour may vary.
Hochiki’s CDX range offers one of the most extensive product portfolios available, providing solutions for most conventional fire detection applications as well as security systems, due to its wide operating voltage range (9.5~30 VDC).

www.hochikieurope.com/cdx
SOC-E3N
A Conventional Photoelectric Smoke Detector which is fully compatible with the majority of existing Conventional systems.
- Removable, High Performance chamber
- Automatic Sensitivity Window Verification (ASWV) – Drift Compensation Technology
- Remote Indicator output
- Wide voltage range (12 ~ 30 VDC)
- Low profile design with one piece outer cover
- Single fire LED - 360° viewing
- Range of mounting bases
- Approved by LPCB.

DCD-AE3
A Conventional Rate of Rise Heat Detector incorporating a 60°C fixed temperature element. The thermistor and linearising circuit provide an accurate linear response Heat Detector. A third terminal provides integral remote indicator output.
- Electronic linear heat detection
- Remote Indicator output
- Wide voltage range (9.5 ~ 30 VDC)
- Twin fire LEDs allow 360° viewing
- Range of mounting bases
- Approved by LPCB & VdS.

DCD-CE3
A Conventional Rate of Rise Heat Detector incorporating a 90°C fixed temperature element. The thermistor and linearising circuit provide an accurate linear response Heat Detector. A third terminal provides integral remote indicator output.
- Electronic linear heat detection
- Remote Indicator output
- Wide voltage range (9.5 ~ 30 VDC)
- Twin fire LEDs allow 360° viewing
- Range of mounting bases
- Approved by LPCB & VdS.

DFJ-AE3
A Conventional 60°C Fixed Temperature Heat Detector using a thermistor and linearising circuit to provide an accurate linear response Heat Detector. A third terminal provides integral remote indicator output.
- Electronic linear heat detection
- Remote Indicator output
- Wide voltage range (9.5 ~ 30 VDC)
- Twin fire LEDs allow 360° viewing
- Fixed Temperature Detector
- Full range of mounting bases
- Approved by LPCB & VdS.
**DFJ-CE3**
A Conventional 90°C Fixed Temperature Heat Detector using a thermistor and linearising circuit to provide an accurate linear response. A third terminal provides integral remote indicator output.
- Electronic linear heat detection
- Wide voltage range - can be installed on security systems
- Twin fire LEDs allow 360° viewing
- Fixed Temperature Detector
- Full range of mounting bases
- Approved by LPCB & VdS.

**DFG-60BLKJ**
An IP67 Waterproof Conventional 60°C Fixed Temperature Heat Detector with minimal standby current and high reliability. Particularly suited to environments, which are exposed to high levels of condensation or are hosed down.
- Waterproof design – rated to IP67
- Low profile shape
- Utilises a bi-metallic strip to sense temperature change
- No Mounting base required
- Minimal standby current
- Approved by LPCB & VdS.

**DRD-E**
A Conventional Flame Detector designed for internal use to detect large flames. The detector fits any of the CDX range of mounting bases. The detection zone is a 90° cone and the detection range is up to and including 25m.
- Class 1 performance as defined in BS EN54-10:2002 (range up to 25m)
- Single IR technology
- Robust and slim design
- Low current consumption
- Easy to install
- Fits any of the CDX Range of mounting bases
- Twin LEDs for 360° view
- Approved by LPCB & VdS.

**IFD-E**
A Conventional IR Infrared Flame Detector designed to respond to low-frequency (1 to 15Hz) flickering IR radiation emitted from flames during combustion, the unit can discriminate between flames and spurious sources of radiation such as sunlight. An I.S. version and an explosion-proof version are also available.
- Triple IR sensor
- Class 1 sensitivity to EN54-10 detects 0.1m² fire @ 25m
- Excellent optical interference immunity (solar blind)
- Selectable output options - conventional 2-wire, 4-20 mA, latching or non-latching relay contacts, fire/fault, pre-alarm
- Selectable response speed
- Optical self-test
- Low power consumption
- Approved by LPCB
- SIL Capable.
A UV/Dual IR Flame Detector, Alloy Housing Model 16591 is an IR² flame detector with an additional UV detection element, designed for use where open flaming fires may be expected and responds to the light emitted from flames during combustion. The detector discriminates between flames and other light sources by responding only to particular optical wavelengths and flame flicker frequencies. This enables the detector to avoid false alarms due to such factors as flickering sunlight.

- Highest immunity to false sources
- Suitable for indoor and outdoor areas
- Detects invisible flames from fuels such as Hydrogen and other inorganic fuels
- Selectable response speed
- Optical self-test
- Low power consumption
- Approved to EN54.

A Hand Held Flame Detector Tester providing a flame-free method of UV testing the industrial IR¹ series of flame detectors: IFD-E, IFD-E(IS) and the IFD-E(Exd).

- Simple to use hand held unit with rechargeable NiCd battery pack and charger
- Tests many Flame Sensors Types UV, UV/IR, UV/IR², IR³, IR
- Range typically 3m and beyond
- Selectable optical output intensity with LED bar graph indication
- Flame-free UV testing, ideal for hazardous areas.

THIS EQUIPMENT IS ALSO AVAILABLE FOR HIRE. Please contact your Sales Representative for further information.

A Conventional Beam Smoke Detector that consists of an emitter and receiver that cover a distance of 5 - 100m providing a maximum coverage of 1500m². Features an automatic signal strength adjustment facility and is also available with a latching or a non-latching relay.

- 5 - 100m range
- Automatic compensation
- Automatic signal strength adjustment
- Can be interfaced onto ESP system via CHQ-DZM(SCI) or CHQ-SZM2(SCI)
- Approved by LPCB & VdS
- Emitter unit can be powered direct from zone (or loop).

A Conventional Detector Mounting Base associated with the CDX Range of Detectors and Beacons and is fully compatible with the majority of existing conventional fire alarm control panels.

- Integral remote indicator output
- Low Profile, only 8mm
- Rugged design and electronics free
- Quick connections via square cable clamps
- Accepts up to 2.5mm² cables
- Bayonet slot, low insertion force for detectors.
YBO-R/6PA
A Conventional Detector Mounting Base for 2-Wire systems where detectors and sounders are on same zone cables*.  
- Integral remote indicator output  
- Rugged design  
- Dedicated cable screen terminal  
- Quick connection via square cable clamps  
- Accepts up to 2.5mm$^2$ cables  
- Bayonet slot, low insertion force for detectors.

YBO-R/6R
A Conventional Latching Relay Detector Mounting Base associated with the CDX Range of Detectors and is fully compatible with the majority of existing conventional fire alarm and security control panels.  
- Integral remote indicator output  
- Rugged design  
- Quick connections via square cable clamps  
- Accepts up to 2.5mm$^2$ cables  
- Bayonet slot, low insertion force for detectors  
- Approved by LPCB  
- In-line Schottky Diode for Line Continuity  
- Accepts up to 2.5mm$^2$ cables  
- Bayonet slot, low insertion force for detectors  
- Approved by LPCB.

YBO-R/6RN
A Conventional Non-Latching Relay Detector Mounting Base associated with the CDX Range of Detectors and is fully compatible with the majority of existing conventional fire alarm and security control panels.  
- Integral remote indicator output  
- Wide voltage range - can be used in security systems  
- Rugged design  
- Quick connections via square cable clamps  
- Accepts up to 2.5mm$^2$ cables  
- Bayonet slot, low insertion force for detectors  
- Approved by LPCB.

YBO-R/6RS
A Conventional Latching Schottky Diode Relay Detector Mounting Base associated with the CDX Range of Detectors and is fully compatible with the majority of existing conventional fire alarm control panels.  
- Integral remote indicator output  
- In-line Schottky Diode for Line Continuity  
- Rugged design  
- Quick connections via square cable clamps  
- Accepts up to 2.5mm$^2$ cables  
- Bayonet slot, low insertion force for detectors  
- Approved by LPCB.

*Please ensure control panel compatibility.
YBN-R/6SK
A Conventional Detector Mounting Base with in-line Schottky Diode, associated with the CDX Range of Detectors and is fully compatible with the majority of existing conventional fire alarm control panels.

- Integral remote indicator output
- In-line Schottky Diode for line continuity
- Low profile, only 8mm
- Rugged design
- Quick connections via square cable clamps
- Accepts 2.5mm² cables
- Bayonet slot, low insertion force for detectors.

CSB-E
A Conventional Base Sounder which has been designed to complement the CDX range of detectors. Improved electronic design enables very low current consumption whilst providing a range of tones and volumes selectable from each unit.

- Robust design
- Low current consumption
- Easy to install
- Maximum 93 dB(A) @ 1m (Tone 1)
- 32 user-selectable tones and 3 user-selectable volumes
- Lockable cap available (CS/CAP).

CSBB-E
A Conventional Base Sounder Beacon which has been designed to complement the CDX range of detectors. Improved electronic design enables very low current consumption whilst providing a range of tones and volumes selectable from each unit. Features integral beacon.

- Robust design
- Low current consumption
- Easy to install
- Maximum 93 dB(A) @ 1m (Tone 1)
- 32 user-selectable tones and 3 user-selectable volumes
- Utilises high intensity LEDs
- Lockable cap available (CS/CAP)
- Supplementary indicator
- Non EN54-23 compliant.

CWSB-E
A Conventional Wall Sounder Beacon with improved electronic design enables very low current consumption whilst providing a range of tones and volumes selectable from each unit. Features integral beacon.

- Robust design
- Low current consumption
- Easy to install
- Maximum 113 dB(A) @ 1m (Tone 15)
- 32 user-selectable tones
- Utilises high intensity LEDs
- Supplementary indicator
- Non EN54-23 compliant.
**BANSHEE EXCEL**
An Electronic Conventional Sounder which can be installed internally.
- Robust design
- Low current consumption
- Easy to install
- Maximum 110 dB(A) at 1m (dependent on tone selected)
- 32 user-selectable tones
- Approved by VdS.

**BANSHEE EXCEL IP66**
An Electronic Conventional Sounder comes with a deeper IP66 back box, which enables the unit to be installed externally.
- Robust design
- Low current consumption
- Easy to install
- Deep base provides IP66 protection
- Maximum 110 dB(A) at 1m (dependent on tone selected)
- 32 user-selectable tones
- Approved by VdS.

**BANSHEE EXCEL LITE**
An Electronic Conventional Sounder Beacon which can be installed internally.
- Robust design
- Low current consumption
- Easy to install
- Xenon beacon technology
- Maximum 110 dB(A) at 1m (dependent on tone selected)
- 32 user-selectable tones
- Approved by VdS
- Supplementary indicator
- Approved by VdS
- Non EN54-23 compliant.

**BANSHEE EXCEL LITE IP66**
An Electronic Conventional Sounder Beacon comes with a deeper IP66 back box, which enables the unit to be installed externally.
- Robust design
- Low current consumption
- Easy to install
- Xenon beacon technology
- Deep base provides IP66 protection
- 32 user-selectable tones
- Approved by VdS
- Supplementary indicator
- Non EN54-23 compliant
- Maximum 110 dB(A) at 1m (dependent on tone selected).
A Conventional Visual Indicator for use on 24 V Sounder Circuits. The unit is fitted with a Fresnel lens and high-intensity LEDs, a design which produces a highly visible flash. The casing exactly matches the CDX Detector range in shape and colour providing seamless integration.

- High Intensity LED technology
- Fits standard CDX base (YBN-R/6)
- Supplementary indicator
- Not EN54-23 compliant
- Colour-matched to existing detector and base ranges.

A Conventional Beacon which features high output LEDs, advanced optics and an innovative lens design, providing outstanding Omni-directional light coverage at low current draw. Specifically designed for, and approved to meet EN54-23. CWST-S5 delivers quality, reliability and long operational life.

- Approved to EN54-23, C & W categories*
- Advanced optics ensures superior light coverage at low current draw
- Available in either red or white casings
- Available with either a red or white LED
- Synchronised flash exceeds EN54-23 standard
- Soft start feature reduces power surges during system start-up.

A Conventional Weatherproof Beacon, which features high output LEDs, advanced optics and an innovative lens design, providing outstanding Omni-directional light coverage at low current draw. Specifically designed for, and approved to meet EN54-23. Weatherproof base provides IP65 for external use applications.

- Approved to EN54-23, C & W categories*
- Available in either red or white casings
- Available with either a red or white LED
- Synchronised flash exceeds EN54-23 standard
- Soft start feature reduces power surges during system start-up
- Advanced optics ensures superior light coverage at low current draw.

A Conventional Alarm Bell six inches diameter and for internal use, based upon the industry standard KOBELL range.

- Low profile
- Low current consumption
- Fully suppressed and polarised
- 95 dB(A) at 1m (typ)
- Approved by LPCB
- Simple installation with multi-fixing base plate.

*For product variants, see pages 50 to 53.
FB/024/R/W
A Conventional Alarm Bell six inches diameter, which has the same operation as the MBF-6EV except it comes equipped with a weatherproof back box enabling it to be used externally.
- Low profile
- Low current consumption
- Fully suppressed and polarised
- 100 dB(A) at 1m (typ)
- Weatherproof for external installation
- Approved by LPCB
- Simple installation with multi-fixin base plate.

CCP-E
A Conventional Manual Call Point based upon the industry standard KAC world series housing. The unit can support either a ‘Frangible Glass’ element or a ‘Non Frangible Plastic’ element. It is also supplied complete with SR-BACKBOX for surface mounting.

Note - Yellow version not EN54 compliant
- Approved to EN54-11:2001
- Other colours available on request
- Approved by LPCB
- Terminals can accommodate up to a 2.5mm² solid conductor.

CCP-W
An IP67 Conventional Weatherproof Call Point which can be used externally.
- Approved to EN54-11:2001
- Supplied with back-box as standard
- Other colours available on request
- Ingress Protection rated to IP67
- Approved by LPCB
- Terminals can accommodate up to a 2.5mm² solid conductor.

CCP-SAVWIRE
Conventional Savwire Call Point Red based upon the industry standard KAC world series housing and features easy to install, push-fit wiring terminals. The unit has been specifically designed for use on “Savwire” (two-wire) systems.

The unit can support either a ‘Frangible Glass’ element or a ‘Non Frangible Plastic’ element.
- Approved to EN54-11:2001
- Terminals can accommodate up to a 2.5mm² solid conductor
- Designed for use on “Savwire” (two-wire) systems*.

*Please ensure control panel compatibility.
CCP-KS

Conventional Key Switch Manual Call-Point based upon the industry standard KAC 9000 series housing and features flying leads for simple wiring.

The unit features two key positions marked as “1” and “0” – with the key easily removable in either position

- Two position keyswitch (marked 1 and 0)
- Key removable in both positions
- Supplied with back box for surface fixing
- Terminals can accommodate up to a 2.5mm² solid conductor
- Supplied in RED - other colours available on request
- Suitable for fire, security and other specialist applications.
The Linear Heat Detection Cable (LHDC) System from Hochiki is designed to provide early detection of fire and overheating in circumstances where other forms of detection would not be viable, either due to inability to sustain the environment requirements or through prohibitive costs.

www.hochikieurope.com/lhdc
**LDM-519-LP**

Analogue LHDC Interface

The module is designed to monitor a zonal length of Analogue Cable for both an elevated temperature (Fire) condition, and Fault Status (Open & Short Circuit).

- Adjustable Alarm set point
- LED Indication of Fire, Fault and Supply Status
- Fault Monitoring for open & short circuits
- Selectable Latching / Auto reset operation
- VFC outputs for Fire & Fault conditions
- SIL 2 Certified
- 24 volt supply required when connected to an I/O unit
- Analogue address interface, Line powered configurable
- Operable from two wire fire panel trigger circuits.

**LHDC ANALOGUE CABLE**

Analogue LHDC Heat Detection Cable is designed to provide early detection of fire and overheating in circumstances where other forms of detection would not be viable, either due to inability to sustain the environment requirements or through prohibitive costs.

- Adjustable Alarm set point
- Recoverable and resettable operation
- Can detect hot spots
- Zones of up to 500m in length
- Mechanical & Chemical protection available
- Easy to install
- RoHS compliant — Lead Free
- Resettable cable
- Compatible with a full range of monitoring devices.

**LDM-519-DDL**

Digital Interface with Distance Display is designed to monitor a length of Digital Linear Heat Detection Cable (LHDC) for both a fire condition, and fault status (open circuit).

- Test & Reset functions
- Display of Alarm Location: Distance in metres
- Fault monitoring of LHDC for open circuit conditions
- LED Indication of Fire, Fault and Supply Status
- Operable from two wire fire panel conventional circuits. Line / Low Power
- LHDC Hazardous Area use by means of intrinsically Safe Zener Barriers.
- Din Rail mounting
- Analogue address loop interfacable - Loop Powered configurable
- 4 to 20 mA instrumentation current loop output
- VFC outputs for Fire & Fault conditions - Selectable.

**LHDC DIGITAL CABLE**

Digital LHDC Heat Detection Cable is designed to provide early detection of fire conditions and overheating in circumstances where other forms of detection would not be viable, either due to an inability to sustain the environment requirements or through prohibitive costs.

- UL Listed
- SIL 2 Certified
- Non-resettable cable
- Early Detection of hazards at temperatures well below flame point
- Rugged construction—Stainless Steel outer sheath available
- Fixed Alarm Trigger Temperature
- Compatible with many existing zone monitors/ Control Equipment
- Intrinsically Safe Configurable for Hazardous Areas.

*Other products available. Please speak to your regional sales manager or visit www.hochikieurope.com/lhdc for further details.*
Hochiki’s FIREwave system raises wireless fire detection and alarm systems to new levels of reliability and flexibility. The hybrid system utilises the latest wireless technology to provide rapid, yet economic wireless fire system installations with the minimum of disturbance to the surroundings. Ideal for historic buildings, remote sites and any project where the installation of fire cabling is difficult, overly expensive or prohibited.

www.hochikieurope.com/firewave
**RSM-WTM**

A *Wire to Wireless Translator Module* which allows a wireless fire detection system to be interfaced directly onto the loop. Fully loop-powered, the unit can support up to 32 wireless devices* and up to 7 RSM-EXP Expander Modules**.

- Loop Powered
- Bi-directional wireless communication
- Automatic wireless channel hopping
- Fully intelligent
- High reliability and sensitivity
- Flexible on site device adjustment
- IP65 protection for exterior mounting
- Makes additions to existing wired systems easy and cost effective
- LPCB approved
- Self optimising wireless amplitude and frequency.

**RSM-EXP**

A *Wireless Expander Module* which allows extended signal coverage for the wireless system by boosting signal strengths from translators, to cover larger buildings for example. Up to 7 RSM-EXP Expander Modules** can be supported by a single RSM-WTM Wireless Translator Module.

- Bi-directional wireless communication
- Automatic wireless channel hopping
- Fully intelligent
- High reliability and sensitivity
- Flexible on site device adjustment
- IP65 protection for exterior mounting
- Makes additions to existing wired systems easy and cost effective
- Requires external power supply (24 VDC)
- LPCB approved
- Self optimising wireless amplitude and frequency.

The RSM-WTM Translator Module (T) is fitted to the analogue addressable fire system loop. It then provides an interface between the loop and the wireless devices. The module is fully powered by the loop and full control and monitoring of the wireless devices is possible through the control panel.

The RSM-EXP Expander Module (E) allows the wireless system to provide greater coverage by receiving and re-transmitting the boosted wireless signal.

*Maximum number of 16 output devices such as A/V or output modules.

**Maximum of 5 child Expander Modules connected in cascade or a maximum of 3 child Expander Modules connected directly to the Translator Module or another Expander Module*
**RSM-CIM**

A Wireless Conventional Interface Module which allows a zone of wireless devices to be added to an existing conventional zone (or as a stand-alone zone). The zone is wired directly to the RSM-CIM which is then in turn supported by an RSM-EXP Expander Module.

- Bi-directional wireless communication
- Automatic wireless channel hopping
- Fully intelligent
- High reliability and sensitivity
- Flexible on site device adjustment
- IP65 protection for exterior mounting
- Makes additions to existing wired systems easy and cost effective
- Requires external power supply for use as stand-alone zone
- Self optimising wireless amplitude and frequency.

**RSM-IP**

A Wireless Single Channel Input Module which allows the on/off status (alarm/fault) of an external device to be transmitted to a control panel wirelessly via an RSM-CIM, RSM-EXP or RSM-WTM.

- Latching input circuits are monitored for fire and fault conditions
- Bi-directional wireless communication
- Automatic wireless channel hopping
- Fully intelligent
- High reliability and sensitivity
- Flexible on site device adjustment
- Makes additions to existing wired systems easy and cost effective
- Self optimising wireless amplitude and frequency.

**RSM-POM**

A Wireless Powered Output Module which allows the control panel to activate/switch the circuits of an external device or system wirelessly via an RSM-CIM, RSM-EXP or RSM-WTM. The unit’s contacts can be configured to be normally open or normally closed and switch at 30 VDC/125 VAC at 2 A. The unit can be configured to provide either a 12 VDC or a 24 VDC output.

- Contacts can be configured as N/O or N/C
- Selectable output - 12 VDC or 24 VDC
- Bi-directional wireless communication
- Automatic wireless channel hopping
- Fully intelligent
- High reliability and sensitivity
- Flexible on site device adjustment
- Makes additions to existing wired systems easy and cost effective
- Self optimising wireless amplitude and frequency.

**RSM-CP**

A Wireless Resettable Manual Call Point which features a simulated glass front. When activated, a plastic ‘flag’ is displayed in the window of the unit; the supplied key will reset the flag and unit. Supplied with back box. Weatherproof housing also available

- Bi Directional wireless communication
- Fully intelligent
- Utilises standard low cost lithium battery technology
- Long battery life
- Resettable Element
- Clear ‘device activated’ warning flag
- High reliability
- Automatic channel hopping
- Self optimising wireless amplitude and frequency.
**ROP-E**
A Wireless Dual Optical Smoke Detector designed for open area protection and utilises dual-path optical smoke detection technologies and algorithms for improved performance, whilst maintaining the high levels of unwanted alarm rejection. Utilising well-proven adaptive radio signal processing algorithms ensure the highest levels of life safety and system reliability are achieved. An in-built magnet test allows easy activation to verify correct functionality and response.
- Advanced dual path optical chamber design
- Internal algorithm processing optimises performance
- 3rd party approved
- Up to 10 year battery life
- Utilises standard low cost lithium battery technology
- Bi-directional wireless communications
- Compatible with all FIREwave Translators and Expanders
- 5 year product warranty
- Device identification tab
- Dual angle scattering analysis
- Fast test feature for engineer testing.

**RHT-E**
A Wireless Class P Heat Detector designed for open area protection giving the best possible warning of a fire condition in locations where smoke detection technology is not suitable. The well-proven adaptive radio signal processing algorithms ensure the highest levels of life safety and system reliability are achieved. An in-built magnet test allows easy activation to verify correct functionality and response.
- Twin alarm LEDs for 360 deg visibility
- Internal algorithm processing optimises performance
- 3rd party approved
- Utilises standard low cost lithium battery technology
- Bi-directional wireless communications
- Multiple sensitivity settings
- Device identification tab.

**RMC-E**
A Wireless Multi-Criteria Detector designed for open area protection and combines both dual-path smoke and heat detection technologies for improved performance, whilst maintaining the high levels of unwanted alarm rejection. Utilising well-proven adaptive radio signal processing algorithms ensures that the highest levels of life safety and system reliability are achieved. An in-built magnet test allows easy activation to verify correct functionality and response.
- Advanced dual path optical chamber design
- Internal algorithm processing optimises performance
- 3rd party approved
- Utilises standard low cost lithium battery technology
- Bi-directional wireless communications
- Multiple smoke and heat sensitivity setting
- Bi-directional wireless communications
- Device identification tab.
- 10 year product warranty
- Device identification tab
- Twin alarm LEDs for 360° visibility.

**HFC-SBR-23-03**
A Wireless Weatherproof Wall Sounder VAD The HFC-SBR-23-03 Wall Sounder VAD forms the core of our wireless EN54-23 modular visual alarm device (VAD) range. The unit comes with a wireless module HFW-SIM-01 which requires fitting into the Wall Sounder VAD back box. The HFC-SBR-23-03 is weather proof as standard and is equipped with 3 levels of volume adjustment, high output LED beacon and 32 recognised tones which can be set locally at the sounder.
- Flexible modular design
- Approved to EN54-3 and EN54-23 (W-2.5-7)
- 32 Tone Settings
- Two stage alarm capability
- Weatherproof as standard
- Easy to install
- Can be configured as Beacon only
- Microphone self test facility
- Also available in White.
HFC-WSR-03
Wireless Weatherproof Wall Sounder
The HFC-WSR-03 Wall Sounder forms the core of our wireless EN54-3 modular alarm device range. The unit comes with a wireless module HFW-SIM-01 which requires fitting into the Wall Sounder back box. The HFC-WSR-03 is weather proof as standard and is equipped with 3 levels of volume adjustment and 32 recognised tones which can be set locally at the sounder.

- Flexible modular design
- Approved to EN54-3
- 32 Tone Settings
- Two stage alarm capability
- Weatherproof as standard
- Easy to install
- Microphone self test facility
- Also available in white.

HFW-BS-05
A Wireless Base Sounder unit is an aesthetically pleasing and cost effective alternative to traditional wall mounted sounder units where visual impact is important. Each unit has an integral moulded base for mounting a FIREwave detector (ROP-E, RMC-E, RHT-E) or a sounder cover if a detector is not required. The unit has as standard 32 recognised sounder tones and 2 levels of volume adjustment, all of which can be easily configured on site. Powered by standard lithium batteries and utilising well proven adaptive radio signal processing algorithms ensure the highest levels of life safety and reliability.

- 2 volume levels
- Approved to EN54-25 and EN54-03
- Bi-directional wireless communication
- Utilises dual low cost standard lithium batteries
- Choice of 32 recognised tones
- Compatible with all FIREwave Translators and expanders
- Integral detector base
- Base adaptor available to allow older sensors to be fitted to new sounder bases.

HFW-BSB-05
A Wireless Base Sounder Beacon is an aesthetically pleasing and cost effective alternative to traditional wall mounted units where visual impact is important. Each unit has an integral moulded base for mounting a FIREwave wireless detector (ROP-E, RMC-E, RHT-E) or a sounder cover if a detector is not required. The unit has as standard 32 recognised sounder tones and 2 levels of volume adjustment, all of which can be easily configured on site. Additional to the audible warning the unit is also fitted with a Red LED visual indicator for added warning capability. Utilising well-proven adaptive radio signal processing algorithms ensures the highest levels of life safety and reliability.

- 3rd party approval to EN54-25 and EN54-03
- Bi-directional wireless communication
- Utilises dual low cost standard lithium batteries
- Choice of 32 recognised tones
- Additional red LED visual indicator
- 2 volume levels
- Base adaptor available to allow older sensors to be fitted to new sounder bases.

HFW-DHR-01
A wireless magnetic door holder is compatible with all of the FIREwave Wireless Translator and Expander Modules enabling it to be easily integrated into a new or existing wireless system, linked to any wired system or even used as a standalone system. Its fully wireless and battery powered capability means it requires no wiring or power supply, making installation quick, easy and cost effective.

- Approved to BS EN 1155
- Easy and Fast installation
- Local door release button
- 5 year battery life
- Utilises standard low cost lithium battery technology
- Bi-directional wireless communications
- A Fail Safe monitoring to BS 7273 - 4:2015 cat. A, B & C
- High holding force
- A Door closed monitoring option.
REPLACEMENT BATTERIES

Primary Battery
Spare Primary Battery (pack of 10)

Secondary Battery
Spare Secondary Battery (pack of 10)
Hochiki’s FIRElink range of high sensitivity air sampling equipment consists of detectors and sampling pipe accessories to the very highest levels of sensitivity in environments such as computer areas and clean rooms. In these applications it is able to give warning to the very slightest trace of smoke. All detectors in the FIRElink range have been approved to EN54-20:2006 Classes A, B & C by LPCB.

www.hochikieurope.com/firelink
**FIRElink-25**
A Single Pipe Air Sampling Detector designed to provide very high sensitivity smoke detection. The unit will automatically setup for easy installation and is also designed to fit into a Docking Station which accepts all sampling pipes and cables leaving the detector to be fitted during the final commissioning phase.

- Approved LPCB
- High sensitivity provided by laser based forward light scatter for reliable early warning
- False alarms reduced by unique dust discrimination
- RS485 communications for networking and remote communications
- Ultra small, low cost aspirating smoke detector
- Single sampling pipe up to 50m in length (still air).

**FIRElink-100**
A Two Pipe Air Sampling Detector designed to provide very high sensitivity smoke detection. The unit will automatically setup for easy installation and is also designed to fit into a Docking Station which accepts all sampling pipes and cables leaving the detector to be fitted during the final commissioning phase.

- Approved LPCB
- High sensitivity provided by laser based forward light scatter for reliable early warning
- Two sampling pipes up to 100m (aggregate) in length (still air)
- RS485 communications for networking and remote communications
- Ultra small, low cost aspirating smoke detector
- False alarms reduced by unique dust discrimination.

**FIRElink-400**
A Four Pipe Air Sampling Detector designed to provide very high sensitivity smoke detection with inherent immunity to dust/dirt build-up. Discriminates between ‘dirty’ and ‘clean’ operating periods such as day and night, automatically substituting appropriate system sensitivity without the need for external input or adjustment.

- Approved LPCB
- High sensitivity provided by laser based forward light scatter for reliable early warning
- Four sampling pipes up to 200m (aggregate) in length (still air)
- RS485 communications for networking and remote communications
- Ultra small, low cost aspirating smoke detector
- False alarms reduced by unique dust discrimination.

**FIRElink-400CM**
A Four Pipe Air Sampling Detector with integral Command Module designed to provide very high sensitivity smoke detection with inherent immunity to dust/dirt build-up. Added “Command Module” allows the user to control, program and test other FIRElink units on the same “network”.

- Approved LPCB
- High sensitivity provided by laser based forward light scatter for reliable early warning
- Four sampling pipes up to 200m (aggregate) in length (still air)
- RS485 communications for networking and remote communications
- Command Module allows control over other FIRElink units on network
- False alarms reduced by unique dust discrimination.
**FL-RC**
An Input Relay Card designed to provide detector inputs that may be programmed for Remote Day/Night Mode Changeover, Remote Reset or ClassiFire Override as well as power supply fault monitoring.
- Relay contacts rated at 0.4 A @ 24 VDC
- 4 staged normally open relay outputs for unmonitored connection to other systems
- Common Fault relay energised normally closed for fail safe operation
- Only compatible with FIRElink-25 and FIRElink-100.

**FL-APIC**
An Addressable Protocol Interface Card used to decode and relay FIRElink detector information directly to an Hochiki ESP compliant Fire Control Panel.
- Full address range (1 - 127)
- Compatible with all FIRElink detectors and command modules
- Supports both single and multi mode operation.

**FIRElink Sampling Pipes**
The sampling pipe and connectors are used in conjunction with the FIRElink Range of Air Sampling Detectors. The PipeCAD software supplied with each FIRElink detector calculates the length of pipe and configuration of sampling holes required for each installation.

**FIRElink Dust Filters**
- FL-DF1 Hochiki Dust Filter For FIRElink 400 Series
- FL-DF2 Hochiki Dust Filter For FIRElink 25/100 Series
Prices and further details provided upon request.
Hochiki’s comprehensive range of ancillary equipment includes products to help make routine maintenance and commissioning of analogue and conventional smoke detectors easier and more reliable. The range includes head removal tools, heat detector tester poles, loop commissioning and emulation equipment and duct smoke detection equipment.
**DH-24**
An Electromagnetic Door Holder designed to hold open fire doors and is ideally suited for hospitals, schools and other public buildings. In a fire situation the doors can be released automatically via a connection to the fire alarm system or manually by activating the release button.
- 24 VDC
- Surface mounted
- 200 Newton holding force
- Swivel keeper plate
- Spring-loaded ejector pin
- Manual release button.

**SDP-3**
A Duct Probe Housing allowing a standard photoelectric smoke detection device, either a conventional detector or an analogue sensor, to be mounted on the outside of an air duct for the purpose of monitoring the air within the duct.
- One-tube air sampling system
- Test hole on cover
- Simple installation/maintenance
- Sensitive flow indication
- Installer-friendly connection of cables
- Allows air duct sampling using standard detector or sensor
- Fits either square or round section ducting (with additional brackets).

**TCH-B200**
A Hand Held Address Programmer designed to address the ESP range of Sensors and other intelligent devices such as the YBO-BS Base Sounder. Designed to be light, robust and easy to use it operates from a single PP3 size battery which can provide up to 8000 operations.
- Lightweight design
- Quick and reliable addressing
- Up to 8000 address settings from one battery
- Displays sensor analogue value.

**16091**
A Hand Held Flame Detector Tester providing a flame-free method of UV testing the industrial IR³ series of flame detectors: IFD-E, IFD-E(IS) and the IFD-E(Exd).

**Note:** Button colour may vary.

**THIS EQUIPMENT IS ALSO AVAILABLE FOR HIRE.**
Please contact your Sales Representative for further information.
- Simple to use hand held unit with rechargeable NiCd battery pack and charger
- Tests many Flame Sensors Types UV, UV/IR, UV/IR², IR², IR², IR
- Range typically 3m and beyond
- Selectable optical output intensity with LED bar graph indication
- Flame-free UV testing, ideal for hazardous areas.
**TESTIFIRE**

A fully portable field device for functional testing of fire detectors. The unit is suitable for testing optical/photoelectric and ionisation smoke sensors, thermal sensors (fixed temperature or rate-of-rise), and carbon monoxide (CO) fire sensors, be they conventional, addressable or analogue addressable.

- Powered by battery batons within pole
- Simultaneous stimuli (smoke and heat) can cut test times in multi-sensors by up to 66%
- Heat detector test times reduced through wider range of settings
- Clearing cycle provides rapid detector reset with no repeat alarm
- Stimuli capsules for smoke and CO held within unit
- Faster, more productive testing with just one tool.

**YBN-UA**

A Recess Mounting Adaptor for both the ESP and CDX Range of sensors and detectors and their associated mounting bases. Allows a base and head combination to be flush mounted by providing a recess fixing to the ceiling.

(Shown with base fitted – not supplied)

- Sturdy construction, easy to install
- Allows base and analogue sensor or conventional detector to be flush mounted
- Supplied with fixing brackets
- Colour-matched to existing ivory-coloured sensor/detector ranges
- Suitable for a maximum ceiling thickness of 30mm.

**YBD-RA**

A Surface Wiring Adaptor which allows the majority of Hochiki Sensors/ Detectors and their Mounting Bases to be fitted flush against a fixing surface, whilst also allowing surface wiring (without conduit) to be connected.

- Low profile - only 16mm
- Compatible with the majority of existing Analogue and Conventional bases
- Colour matches standard Hochiki Analogue and Conventional sensor/detector/base ranges.

**SOLO POLES**

Fibreglass Poles designed to be completely interchangeable with all of the SOLO Tools. Manufactured in a lightweight fibreglass, the poles are completely non-conductive and have been subjected to rigorous conductivity testing to ensure the integrity of the insulating qualities.

- Lightweight, non conductive
- Accept all of the SOLO tools
- Can extend to 9m.
**SOLO 200**
A Universal Detector Removal Tool suitable for the majority of current Hochiki detectors*

*Except those with flying leads, for example the DFG-60E or the ACB-ÉW.

- Colour-coded grips twist into place to create different size combinations
- Universal, counterbalanced joint ensures the tool remains horizontal.

**SOLO 330**
A Smoke Detector Tester providing functional testing to introduce (simulated) smoke or 
CO through the detector vents and into the sensing chamber.

- Robust, lightweight design
- Touch sensitive, ideal for suspended ceilings
- Clear cup allows view of detector LED
- Spring-loaded dispenser mechanism conserves aerosol
- Test gas canisters (non CFC) are available containing either simulated smoke (for testing smoke detectors) or CO (for testing CO detectors).

**SOLO 423/424**
A Heat Detector Tester mains-powered and available in both 110/120 and 220/240 V versions.

- Initiates heat detectors into alarm, whether rate of rise or fixed.
- Comes complete with a 5m lead as standard (Optional 5m extension available).

**SOLO 461**
A Cordless Heat Detector Tester which utilises Cross Air Technology to ensure the correct temperature is applied to the sensing elements, not the detector plastics.

- Safe, cable free, battery-powered operation
- Supplied with 2 Battery Batons™ and a fast charger
- Intelligent device, only heats when detector present.
SOLO 823 KIT
A Universal Set Of Tools for testing and removing smoke and heat detectors up to 9m high.
Contains:
- 1 x Solo 100 Telescopic Pole
- 3 x Solo 101 Extension Pole
- 1 x Solo 200 Universal Detector Removal Tool
- 1 x Solo 330 Aerosol Smoke Dispenser
- 1 x Solo 461 Cordless Heat Detector Test Kit (includes 2 Battery Batons™ and Charger)
- 1 x Solo 610 Protective Carrying Bag.

HE-PSU(2.5A)
A Stand-Alone Power Supply Unit with integrated charger designed to be used with Hochiki’s FIRElink range of air sampling detectors and the CHQ Modules that are non loop-powered (CHQ-DZM, CHQ-DZM(IS) and CHQ-DSC).
- Enclosure mounted with battery space
- Fully enclosed and robust construction
- 110 V or 230 V input
- Regulated, true 24 V output
- House up to 26 Ah batteries
- Status indicators for monitored faults
- Intelligent battery charging and temperature compensation
- Dual output for powering fire alarm control panels remotely.

HE-PSU(5.25A)
A Stand-Alone Power Supply Unit with integrated charger designed to be used with Hochiki’s FIRElink range of air sampling detectors and the CHQ Modules that are non loop-powered (CHQ-DZM, CHQ-DZM(IS) and CHQ-DSC2).
- Enclosure mounted with battery space
- 110 V or 230 V input
- Regulated, true 24 V output
- House up to 26 Ah batteries
- Status indicators for monitored faults
- Fully enclosed and robust construction
- Dual output for powering fire alarm control panels remotely
- Intelligent battery charging and temperature compensation.

SMB-1
An IP66 Rated, Grey (RAL7035) Enclosure designed for use with the Hochiki range of Modules. Supplied with a transparent black lid as standard. Used in conjunction with the SMB-ADAPTOR this enclosure can house any of the PCB assemblies from the Hochiki Smart-Fix Module range.
- 32 knock-outs
- Grey lid available SMB-1(LID)
- Quick-release screws Polyurethane gasket provides IP66 protection
- Temperature resistance to +70°C, Impact resistant, and Non-flammable
- Corrosion free, resistant to most alkaline and acid.
REMOVAL TOOL - 3
Outer Cover Removal Tool allows the case of any photoelectric sensor or detector to be removed easily, even if the locking tabs have been employed. This allows easy access to the photoelectric chamber for maintenance or replacement. Fits ALN-EN, ACC-EN and ATJ-EN only.

SMB-2
An IP66 Rated, Grey (RAL7035) Enclosure designed for use with the Hochiki range of DIN Modules. Supplied with a transparent black lid as standard. The unit is supplied with a DIN Rail section (plus fixings) and will accept up to six Hochiki DIN Rail Modules, side-by-side.
- Quick-release screws
- Polyurethane gasket provides IP66 protection
- 32 knock-outs
- Supplied with DIN Rail and fixings
- Grey lid available SMB-2(LID)
- Temperature resistance to +70°C, Impact resistant, and Non-flammable
- Corrosion free, resistant to most alkaline and acid
- Designed to house up to 6 Hochiki DIN Modules.

SMB-3
A Grey (RAL7035) Enclosure Designed for use with the Hochiki range of DIN Modules. Supplied with a transparent black lid as standard. The unit is supplied with a DIN Rail section (plus fixings) and will accept up to four Hochiki DIN Rail Modules, side-by-side.
- 20 knock-outs
- Quick-release screws
- Polyurethane gasket provides IP66 protection
- Supplied with DIN Rail and fixings
- Grey lid available SMB-3(LID)
- Temperature resistance to +70°C, Impact resistant, and Non-flammable
- Corrosion free, resistant to most alkaline and acid
- Designed to house up to 4 Hochiki DIN Modules.

PL-3
Additional Programming Lead 3 Way Connection for use on Hochiki devices that feature the square programming terminal, HCP-E(Sci) call points for example. The jack plug fits into the socket on the TCH-B200 programmer and the square programming plug fits to the device.
- Allows connection of TCH-B200 programmer
- For use with Hochiki devices with square connector.

SMB-2
SMB-3
PL-3
**CHQ-BACKBOX**

The Module Backbox is designed for installations where the CHQ Range of Modules - CHQ-DIM(SCI), CHQ-SZM(SCI), CHQ-DZM(SCI), CHQ-DSC(SCI), CHQ-MRC(SCI), CHQ-DRC(SCI) & CHQ-PCM require mounting within a glanded enclosure. The unit features ten knock-outs suitable for cable glands (not supplied) and accepts the CHQ Modules directly as a lid.

- Provides glanded cable connections
- Compatible with all CHQ Modules
- Robust design.

**CHQ-ADAPTER**

Adaptor for the New CHQ Modules designed to allow the “Smart-Fix” range of CHQ Modules to be housed in existing enclosures originally designed for the first generation CHQ-OEM Modules by modifying the ‘footprint’ of the unit.

- Footprint matches older enclosure sizes
- Allows the PCB component of a CHQ Module to be housed in an enclosure.

**MBB-2**

A Marine Back Box providing a splash proof and secure fixing for the Hochiki ESP and CDX Marine Approved Range of Sensors and Detectors and their associated Bases. Provides an aesthetically pleasing solution where surface fixed devices are required. The housing supports four 20mm glanded entries for cabling access.

- 4 Glanded cable entry holes (glands not supplied)
- Colour matched
- Approved Sensor and Base range
- Provides moisture and dust resistant fixing
- Ideal for bulk-head fixing
- Approved to MED by GL
- GL Type approval
- Non-marine use version available (SBB-2).

**SI-CAP2**

A Protective Cap which can be fitted to the YBO-R/SCI isolator base range, the YBO-BS base sounder or the YBO-BSB base sounder beacon when either of these devices isn't fitted with a sensor. It can also fit the YBN-R/3 and the YBN-R/3(SCI).

- Easy to Fit (Twist-fit)
- Protects Wiring Terminals on Isolator Bases and Base Sounders.
## A Guide To Our Sounder/Beacon Variants
